

Telegram push configuration

1. Create a workflow

1.1 Get the Token

Create a robot (get a token):

Search and private message @BotFather on Telegram.

Click the button and follow the prompts to name the robot.

✕ Close

BotFather

BotFather is the one bot to rule them all. Use it to create new bot accounts and manage your existing bots. [Learn more >](#)

Create a New Bot

← Back

New bot

Enter a name, description and username to create a new bot.

alertbot

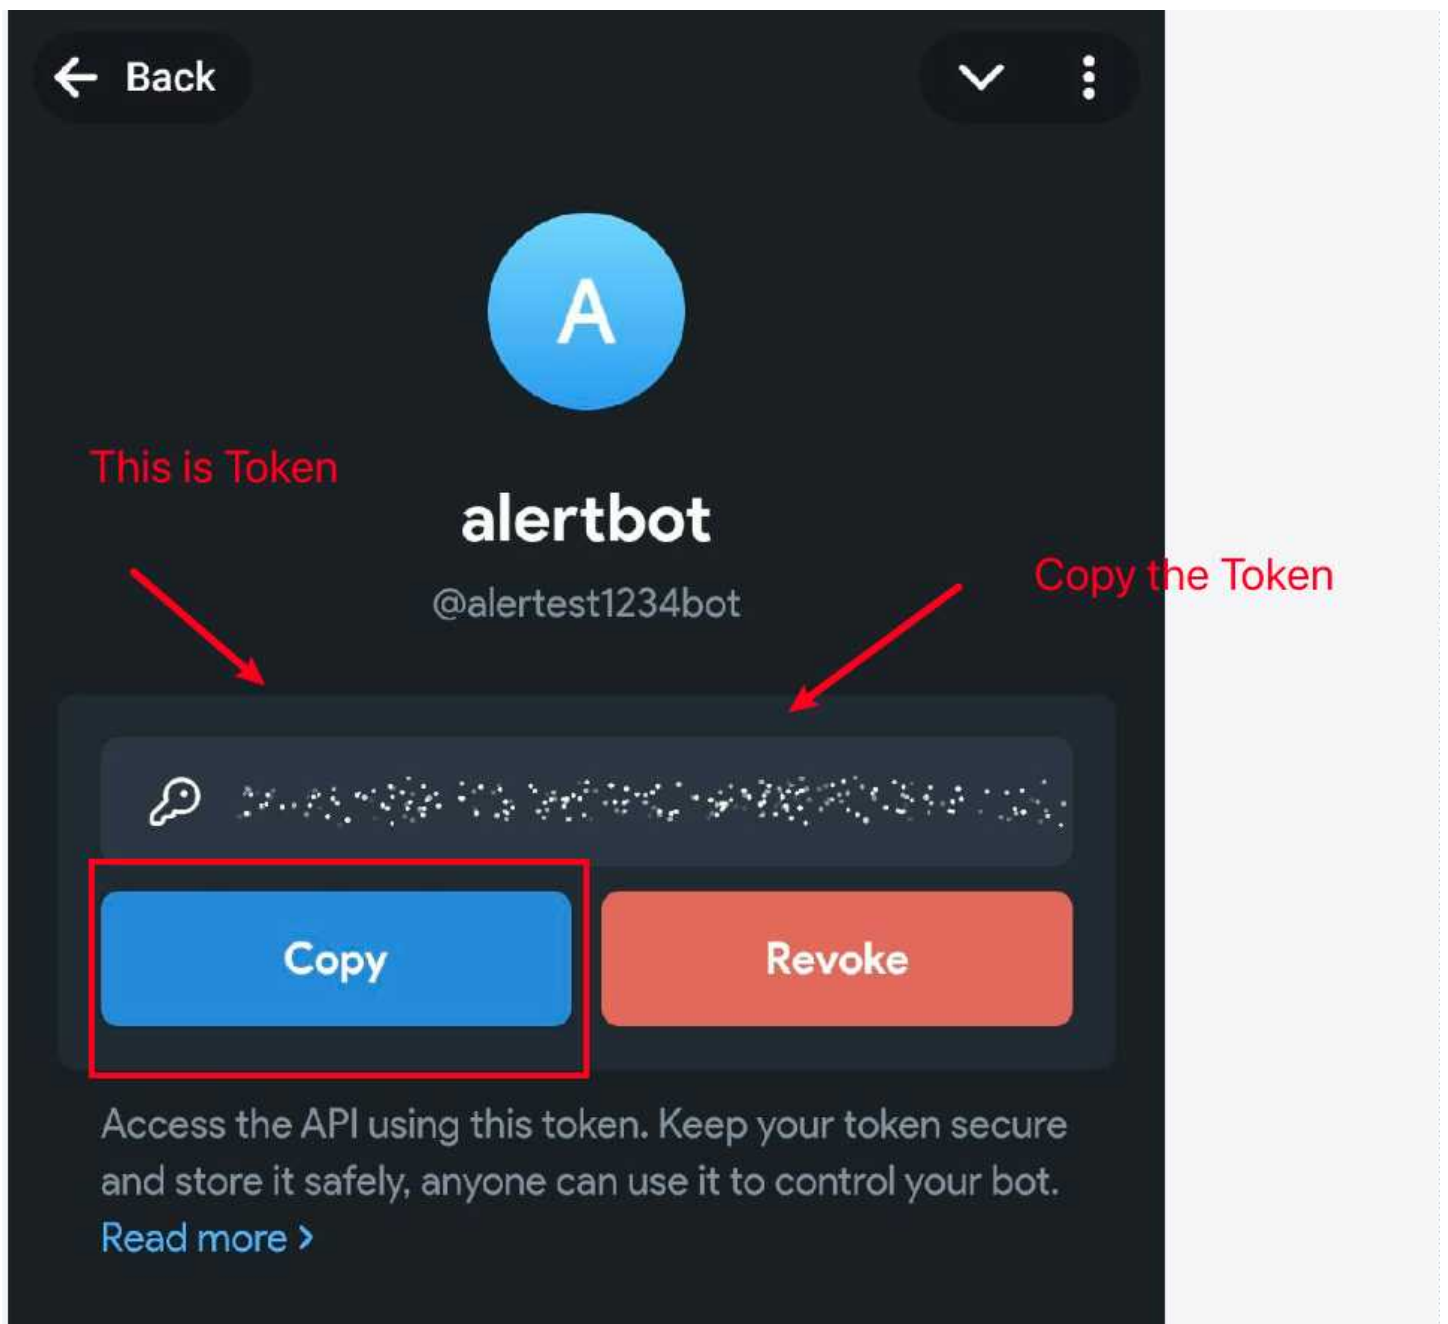

About (Optional)

t.me/alerttest1234bot

alerttest1234bot is available.

Choose a username for your bot. It must end in `bot`.
Like this, for example: TetrisBot or tetris_bot.

After success, you will receive an API Token (for example: 12345678:ABCDEFGH...). Copy and save it for later use.

1.2 Get Chat ID

Search and private message @userinfobot on Telegram.
